PROFESSIONAL SUMMARY

IT graduate focused on AI Engineering, with hands-on experience building AI-powered applications using Python and modern AI technologies. Skilled in LangChain, LangGraph, RAG, multi-agent systems, prompt engineering, and LLM-based applications. Experienced in developing agentic systems for security auditing and conversational document analysis, with an interest in building reliable, evidence-grounded AI systems that solve real-world problems.

EDUCATION

Bachelor of Information Technology | Qassim University, College of Computer
Graduated: June 2026 | GPA: 4.64 / 5.00

TRAINING & BOOTCAMPS

Agentic AI Bootcamp | Saudi Digital Academy (SDA)
7 Weeks | Aug 2026 – Oct 2026

- Intensive training covering Python and ML fundamentals, Generative AI, transformer basics, prompt engineering, RAG, and LangChain.
- Advanced training in AI agents, tool systems, agent memory, planning and task decomposition, multi-agent orchestration, evaluation, guardrails and safety, and agent observability.

PROJECTS

AegisML — Multi-Agent ML Security Auditor
Capstone Project | SDA × WeCloudData

- Developed a multi-agent security auditing framework for ML pipelines using LangGraph.
- Implemented testing and risk-scoring modules for detecting ML security vulnerabilities.
- Used AST-based analysis and Docker sandboxing for secure, code-grounded testing.

AI-Powered Academic Research Analyzer

- Built a RAG application for asking questions about uploaded academic papers.
- Implemented conversational memory and page-level source citations using LangChain and FAISS.
- Added automated summaries for methodology, key findings, and full papers.

Emotion Detection System
Graduation Project

- Developed an emotion classification system using NLP and machine learning.
- Trained and evaluated models using Python and transformer-based approaches.
- Applied optimization techniques to improve model performance.

Lost & Found Android Application

- Developed an Android application integrated with Firebase for managing lost and found items.
- Implemented filtering and category-based search functionality.

CERTIFICATES

- AWS Certified AI Practitioner — Learning Path | Amazon Web Services (AWS)
- Data Analyst Associate | DataCamp
- Python 101, 102, 103 | Tuwaiq Academy
- SQL 101, 102, 103 | Tuwaiq Academy
- Power BI 101, 102, 103 | Tuwaiq Academy
- NumPy & Pandas for Data Analysis | Tuwaiq Academy
- Data Visualization using Matplotlib & Seaborn | Tuwaiq Academy

TECHNICAL SKILLS

AI & Agentic AI:

- LangChain • LangGraph • RAG • Multi-Agent Systems • Prompt Engineering • OpenAI API • LLM Applications

Machine Learning & Data:

- Python • Pandas • NumPy • Matplotlib • Seaborn • NLP

AI Infrastructure & Tools:

- FAISS • Docker • Streamlit • Git • GitHub

SOFT SKILLS

• Analytical Thinking • Problem Solving • Critical Thinking • Teamwork • Communication • Time Management • Continuous Learning • Attention to Detail
